WEB DEVELOPMENT

Web development process includes that are good to take to build an attractive, effective and responsive website.

Responsive web design (RWD) is a web development approach that creates **dynamic changes** to the appearance of a website, **depending on the screen size and orientation** of the device being used to view it.

In website, user-friendly is about making it easy for visitors to find the information they need quickly and easily on any device. There are many ways to improve the usability.

Responsive site - we need to build the websites we create in such way that they automatically adopt to the size of the screen we're looking at.

I'm qualified to create such kind of websites and I have also created some responsive web pages like this.

MINI PROJECTS

INDIAN POSTAL

People can enter their six-digit pin code and find out their post office details and more details about Indian postal can be found through this site.
